PROFILE

Takudzwa Gozo is a young accomplished Software Developer with strong background of Machine Learning and AI, MySQL, Git, Flask, Algorithm Design & Analysis, Data Structures, Python, React & React Native, Javascript & Typescript, HTML & CSS, Electron JS, Invision and Php. I am well known for creating robust, high speed APIs, websites, native mobile and desktop applications and being an ambitious problem solver. Capable of creating dynamic, rich and interesting UIs, providing long-term solutions to both front-end developers and back-end developers, creating both logical and innovative solutions to complex problems and having keen interest in technology and software development plus user experience.

With 3 years experience of software development, API development and database programming experience, I offer the technical expertise to organisations which provide an environment where softwares can be developed.

I am currently working as a freelancer developer and also leading development of projects for clients in diverse industries including technology, automotive and retail.

The following is what I am compatible with:

- **Frontend:** React, React Native, Javascript, Typescript, HTML, CSS
- **Backend:** Python, Php
- **Databases:** MySQL
- **Frameworks:** Flask, Kivy, Laravel, Electron JS
- **Others:** Git, Invision
- **Translating wireframes and rapid prototypes to accurate, working code**
